Official Screen Inventory

This list accounts for every state a user will encounter in the app:

- **Fight Select Menu (Mode 2):** A dynamic virtual list where users scroll through and select their next opponent.
- **Combat Interface (Mode 1):** The primary gameplay screen where the fight occurs, displaying the enemy sprite and player controls.
- **Results Screen (Win/Loss):** A post-combat screen triggered when either the player or enemy health reaches 0%, displaying "You Win" or "You Lose".

Detailed Navigation Flow

To move through the application, users follow these logical paths:

- **Menu to Combat:** User taps a fight in the list (e.g., "Fight 4") → The "Select Fight!!!" button becomes enabled → User taps the button to load Mode 1.
+1
- **Combat to Results:** Once the health system detects a 0% value, the app automatically transitions to the Results Screen.
+2
- **Results to Menu:** User taps a "Return to Fight Selection" button on the Results Screen to go back to the Fight Select Menu and choose a new opponent.
- **Exit Combat:** User taps the "X" icon in the top corner of the Fight Mode to abandon the fight and return to the selection list.

Key Interactions & Data Display

- **Data - Fight Menu:** Each list item displays the **Fight Name**.
 - **High Score** will be displayed next to the name if that Stretch Goal is reached.
- **Interaction - List Selection:** Tapping a list item highlights the selection and passes the specific Fight Data to the combat engine.
- **Interaction - Combat: Tapping:** Tapping the top or bottom of the enemy image triggers a player attack, lowering the **Enemy HP %**.
- **Interaction - Combat: Holding:** Pressing and holding the "Guard" or "Duck" buttons activates the defensive state to negate incoming attacks. Failure to do so results in **Player HP %** being lowered.

- **Data — Combat HUD:** Displays real-time **Player HP %** and **Enemy HP %**.
 - As well as **Ball Count** if that Stretch Goal is reached.
